

Van Beek Nutrition Mission Statement:

Van Beek Nutrition is dedicated to providing the highest quality products and services, building customer relationships, and maintaining its leadership in the livestock nutrition

Nursery Program

Van Beek Nutrition Nursery Program:

Van Beek Nutrition fortifies each product with optimum levels of vitamins, trace minerals, and other nutritional supplements to optimize early growth in the nursery.

The Van Beek Nutrition Nursery Program contains a balance of essential fatty acids, prebiotics, and probiotics to promote healthy gut development.

Each product in the Van Beek Nutrition Nursery Program is presented as a high quality pellet or meal with minimal fines to prevent wastage.

VBN Starter 1

Medicated Swine Pellets
A Complete Prestarter Feed
for Pigs

VBN Starter 1 is a first stage starter diet designed to help newly weaned pigs of any size make the critical transition from sow's milk to dry feed.

Features & Benefits:

- Formulated with easily digested ingredients for newly weaned pigs that have limited digestive enzymes
- Provides high levels of milk products to aid transition to dry feed
- Includes plasma as well as whey protein concentrate to get pigs off to a fast start

Feeding Directions: Feed as the sole ration to pigs from 10-13 lbs.

VBN Starter 2

Medicated Swine Pellets
A Complete Starter Feed for
Pigs

VBN Starter 2 is a second stage starter diet designed to be fed after VBN Starter 1. It provides transition from the high milk diets to corn and soybean meal diets.

Features & Benefits:

- Formulated to be the next step down of easily digested ingredients for pigs that are eating well but still have limited digestive enzymes.
- Provides intermediate levels of milk products to aid transition from 1st to 3rd stage starter diets
- Includes lower plasma levels and more whey protein concentrates to encourage appetite and lean growth

Feeding Directions: After VBN Starter 1 is consumed, feed VBN Starter 2 as the sole ration to pigs from 12-15 lbs bodyweight.

VBN Starter 3

Medicated Swine Pellets
A Complete Starter Feed For
Pigs

VBN Starter 3 is a third stage nursery diet designed to be fed after VBN Starter 2. It provides transition from starter diets to grind and mix diets which have high levels of corn and soybean meal.

Features & Benefits:

- Formulated to be the link between easily digested starter diets and grind and mix diets containing higher levels of soybean meal
- Provides low levels of milk products to aid transition from starter to grind and mix diets
- Introduces higher levels of soy products to prepare the pigs digestive system for later diets

Feeding Directions: After VBN Starter1 and VBN Starter 2 ration is consumed, feed VBN Starter 3 as the sole ration to pigs over 15 lbs bodyweight.

VBN Starter 4

Nursery Concentrate
For Further Manufacture of
Feeds

VBN Starter 4 helps the pig transition from pelleted starter diets to soybean and corn diets.

Features & Benefits:

- Formulated to transition the pig between pelleted starter diets and the corn/soy diets
- Enables producer to blend on-farm
- Provides milk sugars and fishmeal for a smooth transition to high count soy diets

Feeding Directions: Add 400 pounds per ton of complete feed. Mix and feed as follows or as directed by your feed representative.

Corn 1150
Soybean Meal..... 450
Nursery Concentrate ... 400
Total 2000

VBN Starter 5

Nursery Base
For Further Manufacture of
Feeds

VBN Starter 5 is blended with soybean meal and corn to supply the nutritional needs of nursery pigs.

Features & Benefits:

- Formulated to supply the nutritional needs in corn/soy diets
- Enables producer to blend on-farm
- Provides high levels of lysine to maximize lean growth
- Levucell SB provides stimulation of the immune system in nursery pigs.

Feeding Directions: Add 100 pounds per ton of complete feed. Mix and feed as follows or as directed by your feed representative.

Corn 1350
Soybean Meal..... 550
Nursery Concentrate ... 100
Total 2000
